🔄 AyxanHesenzade

Profile

Results-driven **Frontend & Mobile Developer** with a strong foundation in building cross-platform applications using **React Native**, **Vue.js**, and **React.js**. Proven ability to deliver full-cycle projects—from architectural design and database modeling (**MySQL**) to final deployment. Possesses practical backend knowledge (**Laravel/PHP**) to ensure efficient API integration and system performance. Passionate about writing clean, maintainable code and transforming complex business requirements into user-friendly digital solutions. Additionally, I maintain a strong personal interest in **Java programming** to broaden my algorithmic understanding and technical perspective.

Skills

Frontend Development

Vue.js (Vuex/Pinia), React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Mobile Development

React Native (CLI & Expo), React Navigation, Android & iOS Deployment, Cross-platform Development

Backend & Database

PHP, Laravel (API Development & Auth), MySQL (Relational Design), RESTful API Integration

Tools & DevOps

Git, GitHub, Postman, Linux Server Management, Decoupled Architecture, Figma (UI to Code)

Professional Experience

Software Developer (Web & Mobile), ERP-INTEL LLC

05/2025 – Present

Developing enterprise-level **ERP systems** and internal management tools utilizing **Microservices architecture**.

Baku, Azerbaijan

- Building cross-platform solutions: working on **Frontend (React.js)** for complex web dashboards and **Mobile (React Native)** for on-the-go access.
- Joined as an Intern and was rapidly promoted to a full-time role due to successful delivery of key modules and quick adaptation to the company's ecosystem.
- Optimizing application performance and ensuring seamless integration between backend services and user interfaces.

Full Stack Developer, Upwork / Remote

04/2024 – 05/2025

Developed and maintained scalable web applications for international clients using **React** and **Laravel**, ensuring high performance and responsiveness.

Baku, Azerbaijan

- Designed database schemas with **MySQL** and integrated RESTful APIs for dynamic data handling.
- Delivered clean, modular code for diverse projects, ranging from e-commerce platforms to custom management dashboards.
- Managed full project lifecycles independently—from requirement gathering to deployment and debugging.

Education

Master of Science in Biotechnology, Baku State University

09/2024 – Present

Baku, Azerbaijan

Projects

Tire Marketplace, *Automotive E-commerce Platform* 01/2026 – Present

Leading the technical development of a niche e-commerce platform dedicated to the automotive tire industry.

- Developing a high-performance Frontend with **React.js**, featuring dynamic filtering algorithms (by size, brand, and vehicle type).
- Designing a scalable architecture to support multi-vendor inventory management and real-time stock updates.

Təsərrüfat.az, *Agricultural Marketplace Ecosystem* 09/2025 – Present

Founded and engineered a digital marketplace connecting farmers with buyers to facilitate the trade of agricultural goods and livestock.

- Architected a robust backend using **Laravel** and **MySQL** to handle complex data relationships and high-volume user traffic.
- Implemented advanced search filters and user-friendly dashboards, significantly improving the digital accessibility of the agricultural sector.
